Re: Proposed Communications Tower

The Town of Windsor Planning Board at its meeting Wednesday, June 26, voted unanimously to recommend the Town Board to approve the site plan request for a communications tower for two-way radios on John Throup's property at 232 and 246 E Boskett Road with one modification.

Members have walked the suggested access route to the proposed tower and feel it is too steep and rocky to be easily accessible during winter and inclement weather. Instead, the Planning Board suggests that access be via an existing logging road that goes due north from the entrance of the suggested access route, skirts a "meadow on the Throup property and accesses the proposed tower footprint from its north side.

A copy of the Planning Board minutes is attached.
