Windsor, NY 13865
Telephone (607) 655-2026

March 2, 2021

Dear Windsor Resident:

The Town has had numerous inquiries from residents about their lack of access to the internet as well as inquiries from residents that have slow, unreliable internet. The Town would like to have every resident have access to cable or fiber for internet service. However, we need to know exactly where there is cable and fiber and where there is no cable or fiber.

We are very pleased that residents have volunteered to help map our town. We are starting that mapping in the southwest corner of the Town where we believe there is no cable or fiber or very little of it. When a volunteer contacts you for information about your lack of internet service or what service you have, we hope you will be cooperative.

Why is this mapping important? The current maps the federal government has are faulty. In fact, the federal FCC has undertaken a project to map the entire country for where the internet is and isn't. When that project is complete, each municipality in the country, including the Town of Windsor, will receive a map of the municipality to review. With our own mapping already done, we will be able to either verify the FCC work or submit what we believe is the correct mapping for our town.

In the meanwhile, the Town is working with Adams Cable and TDS to encourage further expansion in the Town. Our mapping will help the companies with grant applications at the state and federal level.

If you have any questions, please feel free to call me at 607-655-2026 or email at deputysupervisor.tow@gmail.com

Sincerely,

A handwritten signature in blue ink that reads "Carolyn Price". The signature is written in a cursive, flowing style.

Carolyn Price
Deputy Supervisor
Town of Windsor
