Gay E. Canough, President
ETM Solar Works
300 North Street
Endicott, NY 13760

Dear Gay:

We have reviewed your letter of March 22, 2016 and proposal for a solar electric system. There are questions to which we would appreciate response:

1. The conceptual PV layout shows panels sitting near a propane tank and underground pipeline. Is this safe?
2. You stated that NYSEG is asking for another rate increase. Is this for supply or delivery service?
3. What is the projected credit for kWhs going into the grid? Would there be no bills or reduced bills from the utility for supply? Would the credit offset the cost of bond payments?
4. You stated the kWh rate of the proposed solar electric system is a fixed rate for the next 35 years. What does this specifically mean?

Thank you in advance for answering our questions.

Sincerely,

A handwritten signature in cursive script that reads "Carolyn W. Price".

Carolyn W. Price
