Town of Windsor Board  
124 Main St.  
Windsor, NY 13865

Dear Board Members;

The Windsor Partnership wishes to go on record in support of the Bluestone Wind Project.

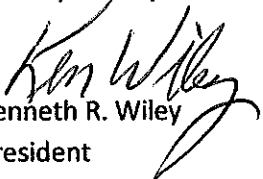

While many of you have been made aware of what are touted to be the negatives of wind electric generation, it is the Partnership belief that the positives outweigh the negatives.

Wind power generation has resulted in over one billion dollars annually distributed to state and local governments and land owners in rural (90%) locals like Windsor.

Bluestone predicts over a 200 million dollar investment locally, which will result in additional local tax revenues, construction jobs, and several permanent employment positions. Additionally, Bluestone has been a contributor to our local First Knight and Corn Festival celebrations. Both events are popular with our local citizens and have made an addition to our community spirit.

Perhaps the overall lasting benefit will be Windsor's contribution towards reducing our carbon footprint as we seek to address the world wide problem of global warming.

Thank you for your continuation of support.
