

Windsor Town Court Reaps JCAP Rewards

On October 23, 2015 Julie Wist (District Office) visited the Windsor Town Court and was stunned by their new reception area!

Pictured below is the new secure area which includes a locked door with crash bar as well as a buzzer by the clerk's desk for remote control of the door. The walk up counter is now enclosed as well. All funds were acquired through JCAP. The job was done by a Binghamton company called Northeastern Plate Glass and consisted of three visits to the court for measurements and one full day for installation.

The court also purchased two solid wood doors, an upgrade to their security system, a scanner (also pictured below), and the scanning utility in SEI with their grant. Congratulations to the Windsor Town Court, your court looks great and is much more secure!
